

**AMENDMENTS TO THE CLAIMS**

The listing of claims below replaces all prior versions of claims in the application.

1. (Canceled)

2. (Canceled)

3. (Canceled)

4. (Currently Amended): A broadcasting receiver configured such that a channel can be changed by comprising a channel UP/DOWN key, a broadcasting receiver comprising:

an analog broadcasting receiving unit for receiving analog broadcasting;

a digital broadcasting receiving unit for receiving digital broadcasting;

a section means for acquiring information as to whether or not the same program is being broadcast in analog broadcasting and digital broadcasting, to judge whether or not there is simulcast; and

a section means for erasing an analog channel, without viewer intervention, on which analog broadcasting in simulcast is being performed at the present time on the basis of an internal clock from a channel UP/DOWN list,

wherein analog broadcasting in which the same program as that in digital broadcasting is being broadcast is not tuned in to by the operation of the channel UP/DOWN key.

5. (Previously Presented): The broadcasting receiver according to claim 4, further comprising:

means for displaying on a screen a message that the same program is being broadcast in digital broadcasting when analog broadcasting in simulcast is being received.

6. (Previously Presented): The broadcasting receiver according to claim 5, wherein digital broadcasting in simulcast is received when a predetermined key is operated in a state where said message is displayed.
